PRODUCT DESCRIPTION

The Widmer JES electric embosser is engineered for fast, high volume embossing such as that found in schools, universities, and governmental agencies. It embosses over 2,000 perfect impressions per hour with the touch of a button, or the step of a pedal. Its interchangeable die clip gives the user a choice of three seal sizes. Three pressure settings assure a perfect impression on a variety of paper stocks. Seals can be imprinted to within 4.5 of the edge of the document. Its skid proof rubber feet protect your desktop, while ensuring the machine's stability. First basic seal is included in the machine purchase price above.

PRODUCT SPECIFICATION
