### PRODUCT DESCRIPTION

The American Perforator 410 is a versatile unit designed for any purpose. In addition to dating, this electric perforator offers the added option of a changeable top line perforation. Words, names, or any lettering of the customer's choice may be placed, or deleted from the line above the date. The custom word is accomplished by means of a matrix key. The machine comes with one matrix key, but additional keys have to be purchased for each additional word at 100 a key. Matrix keys usually contain 8 characters, but that can vary slightly depending on the character width. If necessary, the 410 will also accommodate fixed characters on the third line. Perforates up to 25 sheets at a time. Click on the supplies icon to view the most popular matrix keys.
